**NANTUCKET MEMORIAL AIRPORT ANNOUNCES
EXPANSION OF SERVICES:**

**World-Wide Video Conferencing Center added to Airport Location
September 1, 2009 – Nantucket, MA**

Nantucket Memorial Airport (KACK) today announced an exciting global video conferencing facility at the airport. **Nantucket Video Conferencing** has brought a world-class video conferencing center to the Island, adding to the state-of-the-art services already offered to both travelers and residents of Nantucket.

Nantucket Video Conferencing (NVC) opened its doors to the public on August 21st, 2009 and immediately did a conference with Mumbai, India. No longer do visitors and residents of Nantucket have to travel off-Island to conduct business, have meetings, take classes, do training, conduct Board meetings, take depositions and consult. Nantucket can now reach any location in the World through this high-end video conferencing hub that allows clear connection and fluid information exchange.

With broadcast quality video conferencing equipment, HDTV and high transmission speeds, **Nantucket Video Conferencing** offers real-time, face-to-face meetings in complete privacy. The sense of real “presence” no matter what the distance allows for domestic and international multi-point connection without the need to fly, drive or take the ferry. The facility will be open year-round, 7 days a week from 6 a.m. until 10 p.m..

Nantucket Video Conferencing is located in a secure conference room at the airport (14 Airport Road.) **NVC** is run by seasoned IT and Communications Professionals who have been running video conferencing centers successfully for over 10 years. Travelers and Residents of Nantucket can now communicate with business associates, legal centers, medical facilities and presentation auditoriums without leaving the Island. Video conferencing can also be used for speaking engagements, job recruitment, certification, distance learning, executive coaching, strategy sessions, live performance, film festivals, sales presentations, product review, weddings, real estate negotiations, customer relations and family reunions.

Nantucket Memorial Airport (KACK)'s newly renovated and expanded passenger terminal also includes advanced environmentally responsible (“Green”) technologies such as geothermal heating and cooling systems, tank-less water heaters and low-flow lavatory fixtures with energy saving features. Video Conferencing is just another step in offering contemporary service while retaining the Island character and aesthetic charm.

Susan Taylor and Doris Clark of **Nantucket Video Conferencing** are pleased to offer world-class conferencing services at the **Nantucket Memorial Airport**. Doris and Susan have also established Vineyard Video Conferencing on Martha's Vineyard with a center in Vineyard Haven. They see local communication between the 2 Islands as beneficial to residents and visitors. For more information, or to see a demonstration, please call or e-mail **Nantucket Video Conferencing** via the website: www.nantucketvideoconferencing.com.
